Welcome to a new, exciting year

Last year was also a very productive year for the County of Simcoe, and thanks to the effort and vision of our Councillors, the County is ready to tackle the many exciting projects in 2010.

This year's budget has been approved at \$517 million, allowing us to not only maintain the regional service levels currently enjoyed by our residents, but grow them as your needs change.

Among the list of projects for 2010 is the redevelopment of Georgian Village, the expansion of the Simcoe County Archives, a new joint emergency station for Clearview and Miller Park, an affordable housing project, which will open in Bradford.

A new waste management strategy will start to take shape in 2010, allowing us to address how we can effectively dispose of this region's waste. The County is already a leader in reducing and diverting waste destined for landfills, however, we continue to require responsible solutions.

These projects will help further strengthen the partnerships we have with our communities and continue to build on past successes.

Cal Patterson
